## An Insight into Why Hijāb and His Co-conspirators Slander People of the Sunnah

---

**Part 3b: Digital Evidence Tampering—Forensic Analysis of the Audio Clip’s Filename and Created and Modified Dates—Dajāilah Exposed**

الحمد لله والصلاة والسلام على رسول الله

In **Part 3** of this series we used the evidence of undisputed existing historical record—a conference on **10th September 2005** that was attended by thousands of people—to show the impossibility of the fraudulent date concocted by the Dajājilah for the lecture I allegedly gave on that evening according to them.

In this article, we are going to look at some obvious signs of **digital evidence tampering and hiding**. However, to understand the series of events properly, we have to be clear about the dates.

So on **31st May 2020**, the Dajājilah published the video on the tube in which they used a 2 minute clip from my lecture of 27th February 2010 to malign me.

On **1st June 2020**—while I had no idea of the source and date of the lecture in question—I re-published a document which was the very one I used for the lecture in question, the one in which Sulaymān (عَلَيْهِ السَّلَام) is being exonerated and freed from the false allegation of the Jews. I also added a statement to the end of it.

On the back foot, the Dajājilah then **tampered with the file metadata** and chose 10th September 2005 as their fabricated date. They did this so they could provide “indisputable evidence” to their audience that I had lied when I said that the talk was

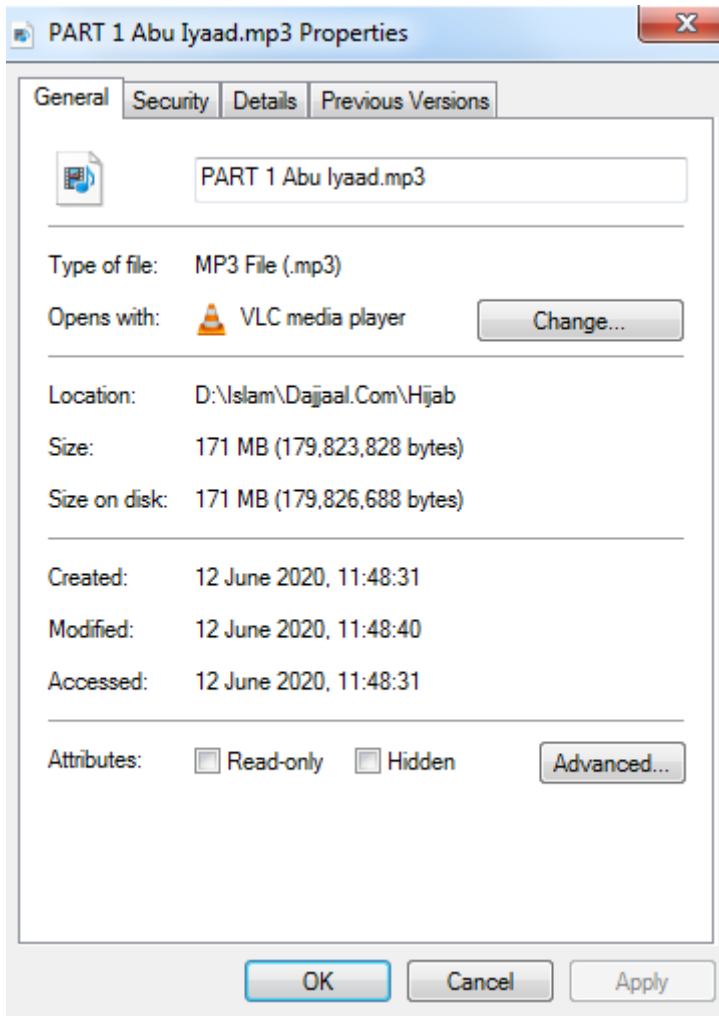

around 2010 or thereafter in my article of 1 June 2020. The accusation of lying could be quickly spread through cyberspace to hundreds of thousands and the accusation would stick, with the knowledge that the audience would never have the means available to them to make their own investigation and verify. To this end, they published a video on **4th June 2020** with this accusation of lying about the date.

Meanwhile, investigations were made about the source of the clip and some days later we traced the original lecture, and found brothers who had the original CD set. The set was collected, verified to be the lecture in question and ripped to MP3.

This means that Hijāb and his co-Dajājilah conspired between the 1st and the 4th of June upon their plot, and engaged in digital evidence tampering and concealment. Note that the evidence of tampering and digital fraud is already established by virtue of the evidence in Part 3a of this series. The fraud has already been busted through historical record alone, and we don't even need any digital forensics. The game is already over. However, this is just to make sure we close all the gaps and do the job properly.

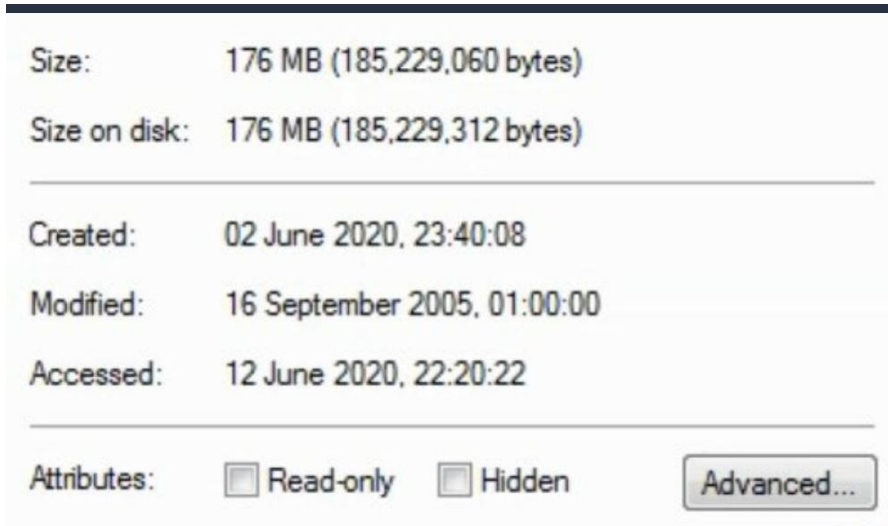

## **THE FORENSICS**

Now, before we look at evidence of tampering of metadata of the file in their possession, I will present here a screenshot of the metadata of the audio file we have of the full lecture that was ripped to MP3 from the CD we found. You will see how the created and modified dates appear, along with the size of the file.

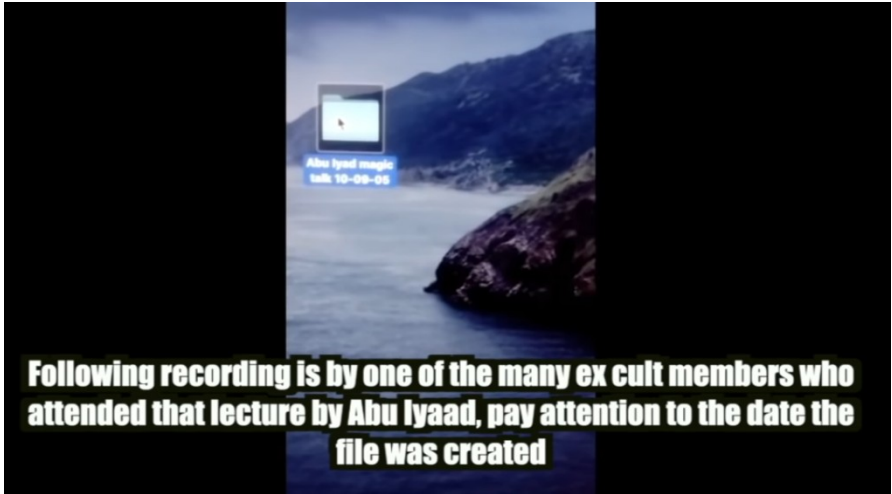

The MP3 file had been uploaded to Dropbox, from which it was downloaded onto a local machine. Note the file size, it is roughly 170 MB in size. Once this is clear, now let us look at some screenshots presented by the Dajājilah in their videos and social media as evidence for their fraudulent claim.

**Image 1.** File metadata provided by the Dajājilah.

This is from a Windows PC, and you can see a file size 176 MB that corresponds to our file size. This is an indication that the file was likely to have been ripped from a CD, and due to typical or default encoding settings, the file sizes are roughly equal. This is proof that the Dajājilah had the full audio lecture and not just a clip. This is proof that they engaged in fabrication and fraud with full knowledge and intent. You can also see an unusual discrepancy between the created date and the modified date, almost 15 years. Note also the very suspicious looking time of **01:00:00** next to the modified date.

**Image 2.** The created and modified date:

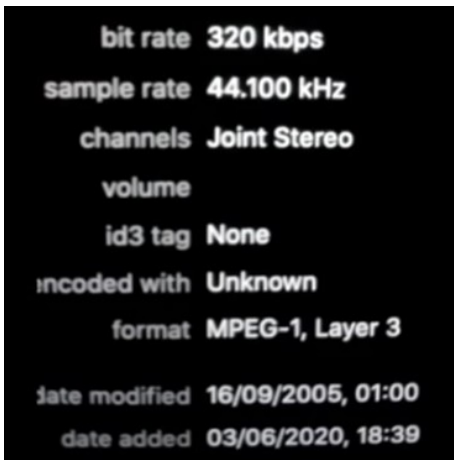

In the above screenshot of a Mac, a folder is shown on the Desktop folder and it has been named: “**Abu Iyaad Magic 10-09-05**”. This has been manually created and given that folder name by the fraudster so it appears as evidence that the file was recorded on that date. However, all it shows is that the fraudster created a folder with that name, nothing more. It is not evidence of anything save the **balādah** (docility) and **sadhājah** (primitiveness) of the fraudster.

**Image 3.** Next, they move to the file.

**Image 4.** The following details are shown:

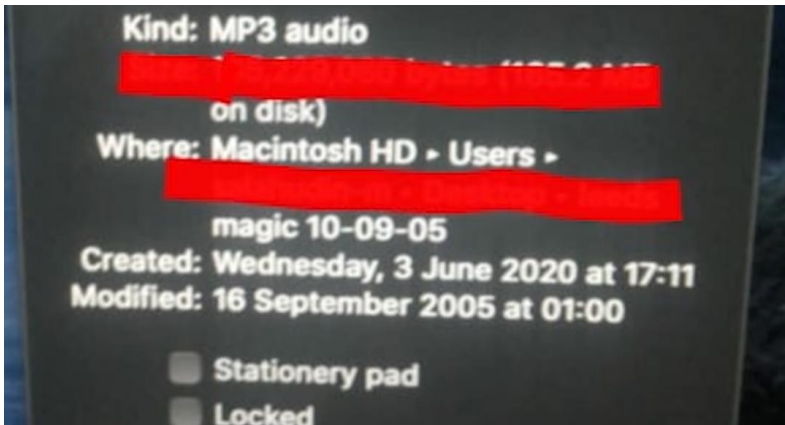

Note the **date added** shows as: 03/06/2020 and the **date modified** is 16/09/2005 at exactly 01:00am, almost a 15 years difference.

**Image 5.** The fraudster(s) point out:

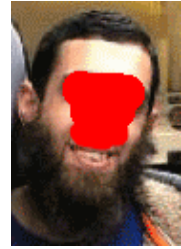

They claim the date of the lecture is 10th September 2005 and the date of the file is “from 16th of September 2005”.

**Image 6.** In another image—which is really interesting—we are shown the following:

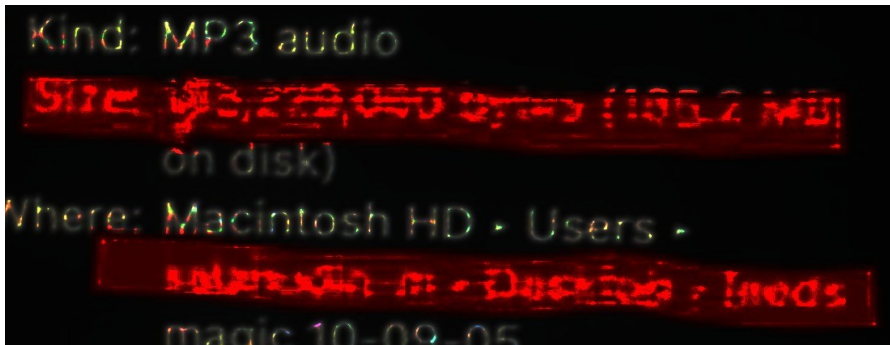

We have made this image available for download because there is something very interesting about it, something you can check for yourself. Please download it from the link below. The image is from the hate-filled, venomous creature known as “Hajji” but whose real name is **Mohammad**

**Naheem Safdar** according to what I am told, and I have heard that he is referred to as “the donkey from Birmingham”. When you read of his antics further below, you will see that this is not far off. When you have this file on your machine or smartphone, zoom in on the area right at the end of the second red line. You should be able to see the word “leeds” underneath the red line, without having to do any filtering or contrasting on the image. You can just about work the letters out. Click the following link or copy and paste in your browser.

<http://www.dajjaal.com/liar/assets/images/magic-talk-date-claim-3.jpg>

**Image 7.** Filter and correction applied to above image in order to reveal size and path details blotted out in red.

The information that the fraudster(s) attempted to hide was the **file size** and also the **folder and file name**. Note that application of filters and colour correction can lead to some degree of distortion in images.

So the **file size** is around 165 MB on the Mac. This matches with our file size of the CD rip, at around 170 MB and also the file size of their version of the full lecture on the PC, which is around 175 MB. You get these differences because of slight variations in encoding settings, but since they are generally at typical default settings, you will get roughly the same size file for a given length of audio. In this case, the talk was one hour and 15 minutes in length and it gave an average size of 170 MB. This is evidence to support the fact that they did have the full lecture and hence, knew exactly what they were doing. It was deliberate, calculated, pre-meditated act of conspiracy to commit fraud. As for the **file path**, you can clearly see that the file path, without the extension shown, is:

**Macintosh HD/Users/[currently not able to decipher this part]/Desktop/leeds magic 10-09-05**

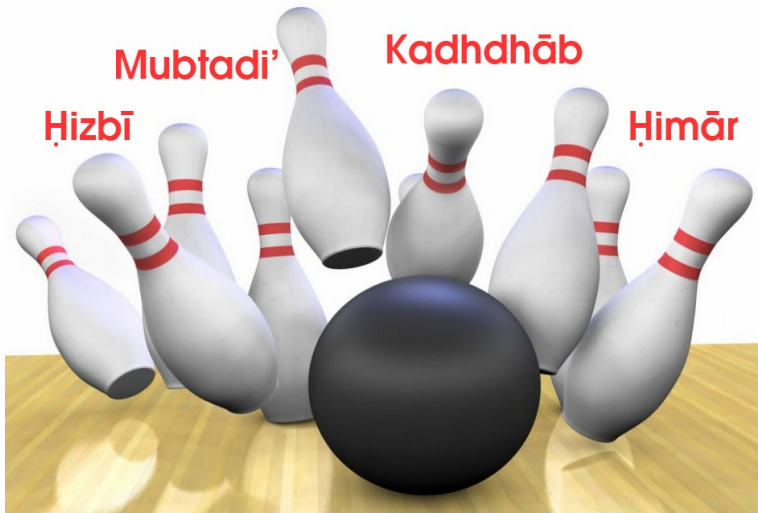

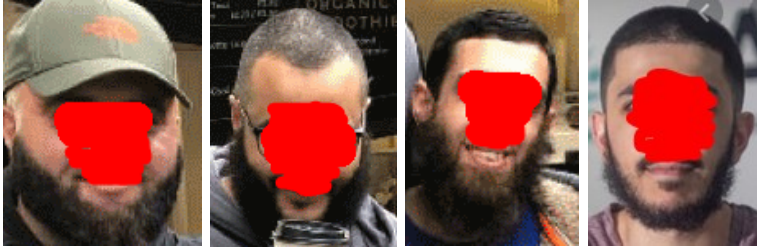

Note how they tried to cover up the word “leeds”, because that would have given the game away, as it would provide a lead for further investigation. You can download this image here:

<http://www.dajjaal.com/liar/assets/images/magic-talk-date-claim-3-contrast.jpg>

This much data is enough, we can now make some analysis in what follows.

## ANALYSIS OF THE FRAUD AND DECEPTION OF THE DAJĀJILAH

To be honest, there is not much to say in terms of analysis, the fraud is clearly evident. **We know that they have all operated as a team, and hence, they all go down as a team.**

The four Dajā'ilah—‘Abd al-Ḥamīd<sup>1</sup>, Muḥammad Ḥijāb and the two very annoying donkeys at the end—all engaged in conspiracy—in a collective sense—with respect to whatever follows:

**1.** They had the full audio lecture and thus, would have known what I explained in Part 2 of this series. They knew of their injustice, that they are motivated by desire and that they are engaged in clear deception.

**2.** The evidence suggests that they got the file of the full lecture from a CD. When I published my article regarding Sulaymān (عَلَيْهِ السَّلَام) on 1st June 2020, they embarked upon their fraud and thought of a way to accuse me of lying when I said the lecture was some time around 2010 or thereafter.

**3.** In **Image 1** you can see that the file created date is **02 June 2020**, whereas the modified date is **16 September 2005**. That's almost **a 15 year discrepancy**. It is clear that the modified date has been modified in one of two ways. Either through a piece of software that allows file metadata editing, or by ripping the CD or saving the file from elsewhere, then changing the system date to the desired date, 16 September 2005. Then opening the file and editing it, then saving it. The modified date of the file will now show the system date. This can be done by anyone on their own computer with any file and anyone can freely search online to see how this can be done.

---

<sup>1</sup> It is said that he is the owner of the account on the tube that is used to attack Salafis online. Since, the connection between them all is clearly established, it seems that this has good weight behind it.

4. In **Image 6**, which is from the video of Hajji, the fraudster tried to conceal part of the filename, the part that says, “leeds”. He did not do a very good job, clearly not enough haylage. Why did he hide the name of the location “leeds”. The reason is clear and obvious to the reader.

I think the reader has had probably had enough. There are sufficient lines of evidence just from these image that these fraudsters—unable to hold back that **seething hatred that consumes them**—lost their minds, and did what they did, thinking they would get away with it. Imagine how much of this type of shenanigans they have already got away with.

In conclusion, we say that the lines are clearly drawn. **You are either with us or you are with the “terrorists”**. Meaning, those who terrorise Muslims against Ahl al-Sunnah, the Salafis, by engaging in these types of behaviours of fraud and deception, and scaring them away from people who would otherwise guide them to truth, guidance and righteous conduct.

No sane person—after learning of what we have covered in this series—can remain attached to these people, or listen to them. If the scholars of the Muslims abandoned the speech of one who misled or tricked a donkey in the matter of its food, then how about the one who misleads hundreds of thousands of people in the manner outlined in matters of religion. Can such a person be trusted in worldly affairs, let alone the affairs of religion?

So the lines are now clearly drawn. If you are seen with any of these Dajājilah and choose their company, after this knowledge

has come to you, then you will be considered an aider and abetter and will be thrown alongside them. You will be treated as one who does not value what Allāh (عَزَّوَجَلَّ) and His Messenger (صَلَّى اللهُ عَلَيْهِ وَسَلَّمَ) have placed value upon, which is truthfulness and honesty and treated as one who knowingly loves falsehood and its people.

We ask Allāh for sincerity and firmness and from protection from tribulations and evil.
